Aspiring Product & Project Manager with a **Bachelor in Law** and hands-on experience in **operations, logistics, and cross-functional coordination** across diverse industries, including **legal services, hospitality, and expedition management**. My background includes roles that required **precision, adaptability, and collaboration**. I continue to sharpen through intensive boot camps at **Purwadhika (Fullstack Software Engineering)** and **Dibimbing.co (Product & Project Management)**.

As part of my portfolio, I developed a **fullstack event management platform** using **Java, Spring Boot, Next.js, and PostgreSQL**, covering user authentication, event scheduling, ticket purchase flows, and referral systems. I also contributed to a **UX case study revamp of Adiraku's Help Center**, applying **qualitative research, user journey mapping, and product documentation (PRD, OKRs)**. These experiences have strengthened my ability to blend **technical understanding, user empathy, and product strategy** into actionable outcomes.
